PROFILE

Engineering graduate with a background in Electronics and Communication and practical experience in machine learning and data Science. Currently a Data Science intern, working on Python-based data processing, exploratory data analysis, and end-to-end ML projects, with an emphasis on model evaluation and real-world problem solving.

WORK EXPERIENCE

Madrid Software | Data Science Intern

Jan 2026 – Present

- Worked on data analysis and applied data science tasks using Python
 - Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on real world datasets
 - Conducted feature engineering to improve data quality and analytical outcomes
 - Built and evaluated predictive models to support data-driven decision-making
 - Gained hands-on experience in end-to-end data workflows, from data exploration to model evaluation
-

PROJECTS

1. [Telecom Customer Churn \(Machine Learning\)](#)

- Built classification models to predict customer churn using telecom usage and demographic data
- Performed feature engineering, encoding, and scaling to improve model performance
- Handled class imbalance and evaluated models using accuracy, precision, recall, and F1-score
- Applied cross-validation and hyperparameter tuning to improve model performance

2. [Expense Tracker \(Python, Streamlit\)](#)

- Developed an interactive expense tracking web app using Streamlit
- Implemented features for adding, viewing, and categorizing expenses
- Focused on clean UI, data persistence, and usability

3. [Netflix Content Strategy \(Exploratory Data Analysis\)](#)

- Conducted EDA on Netflix content dataset to identify trends and patterns
- Analyzed content distribution by genre, release year, and country
- Used data visualization to communicate insights effectively

4. Amazon Prime Content Strategy (Exploratory Data Analysis)

- Conducted exploratory data analysis (EDA) on Amazon Prime content dataset to identify viewing trends and content patterns
 - Analyzed distribution of movies and TV shows by genre, release year, ratings, and region
 - Identified content gaps and trends in regional availability and genre popularity
 - Used data visualization techniques to present insights and support content strategy understanding
-

SKILLS

- **Programming:** Python
 - **Data Analysis:** Pandas, NumPy
 - **Data Visualization:** Matplotlib, Seaborn, plotly
 - **Machine Learning:** Scikit learn, Regression, Classification, Model Evaluation, Hyperparameter Tuning, GridSearchCV / RandomizedSearchCV, Model Optimization using Cross-Validation
 - **Tools & Frameworks:** Streamlit, Jupyter Notebook, VS-code
-

CERTIFICATIONS

- IBM - python for Data Science
 - IBM - Data Analysis Using Python
 - IBM - Data Visualization Using Python
 - IBM - Machine Learning with Python
 - IBM - Data Science Foundations
-

EDUCATION

Al Falah University

2015 - 2018

B.Tech in ECE
